Complete Desk Pens

Parker desk pens and bases match perfectly. The pens have been chosen by a well known style authority to harmonize or contrast with the base materials and colors.

The same quality and precision of workmanship is obtained in desk pens and pencils as in (public's choice) Parker Vacumatic, Challenger, and Parkette pocket models.

Parker's New Sealomatic Rocker Bowl

*overcomes 2 chief faults
of Average Pen Desk Sets*

1 Ends seepage of ink from pen into pen retainer.

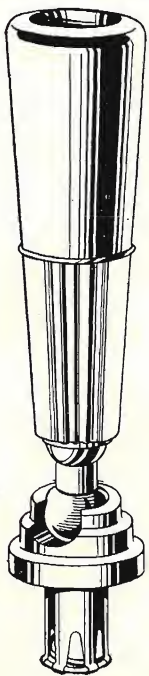

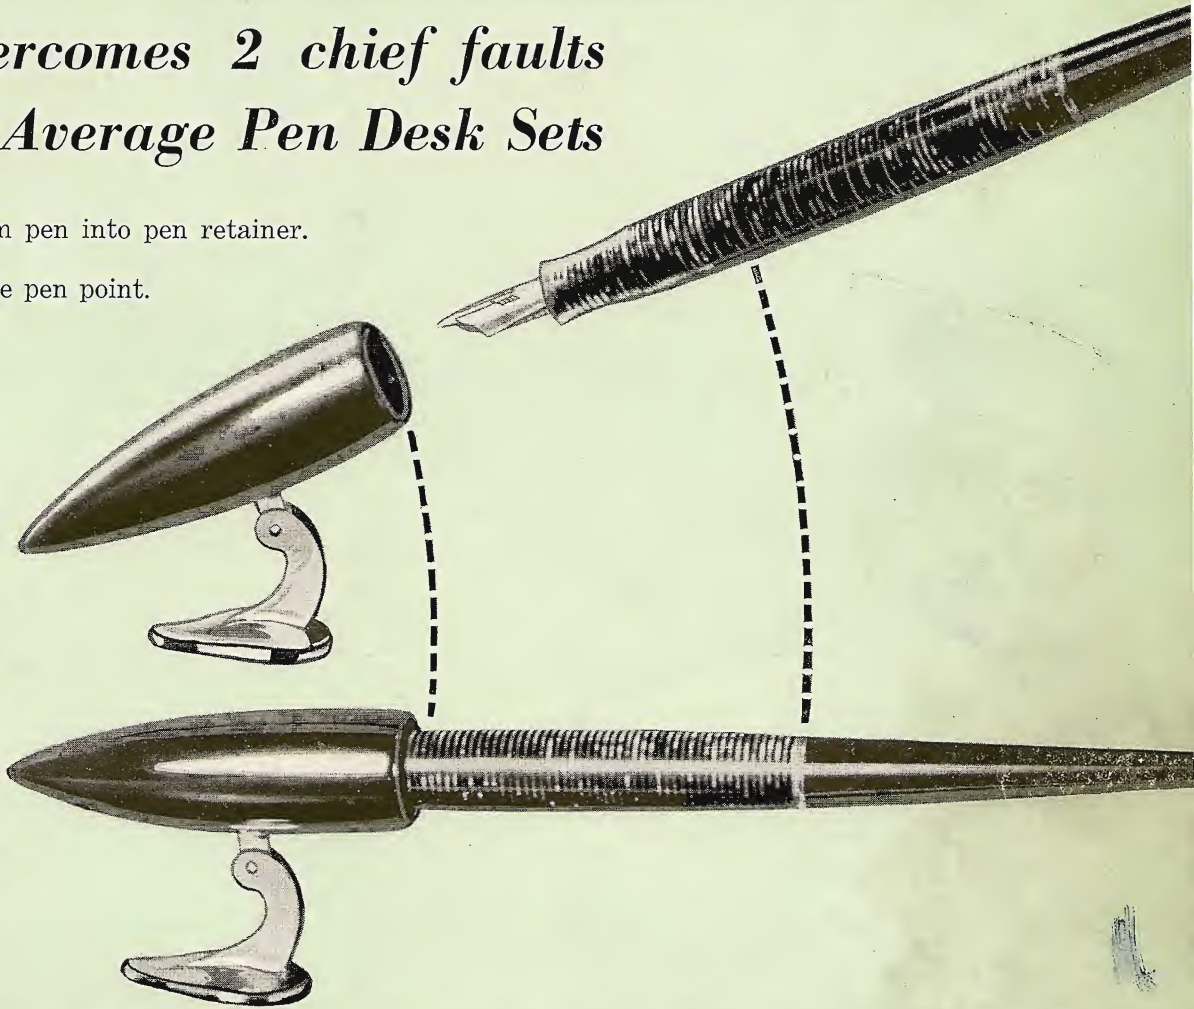

2 Ends drying of ink on the pen point.

1 Automatically tilts upward to receive pen.

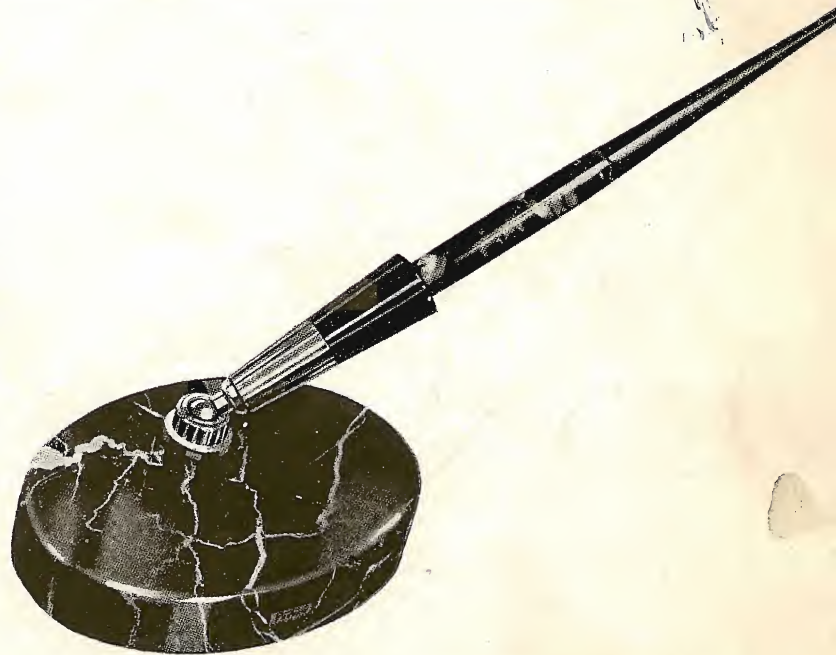

2 Automatically pivots to near level rest when pen is inserted—hence gravity pull is lessened — ink cannot seep out.

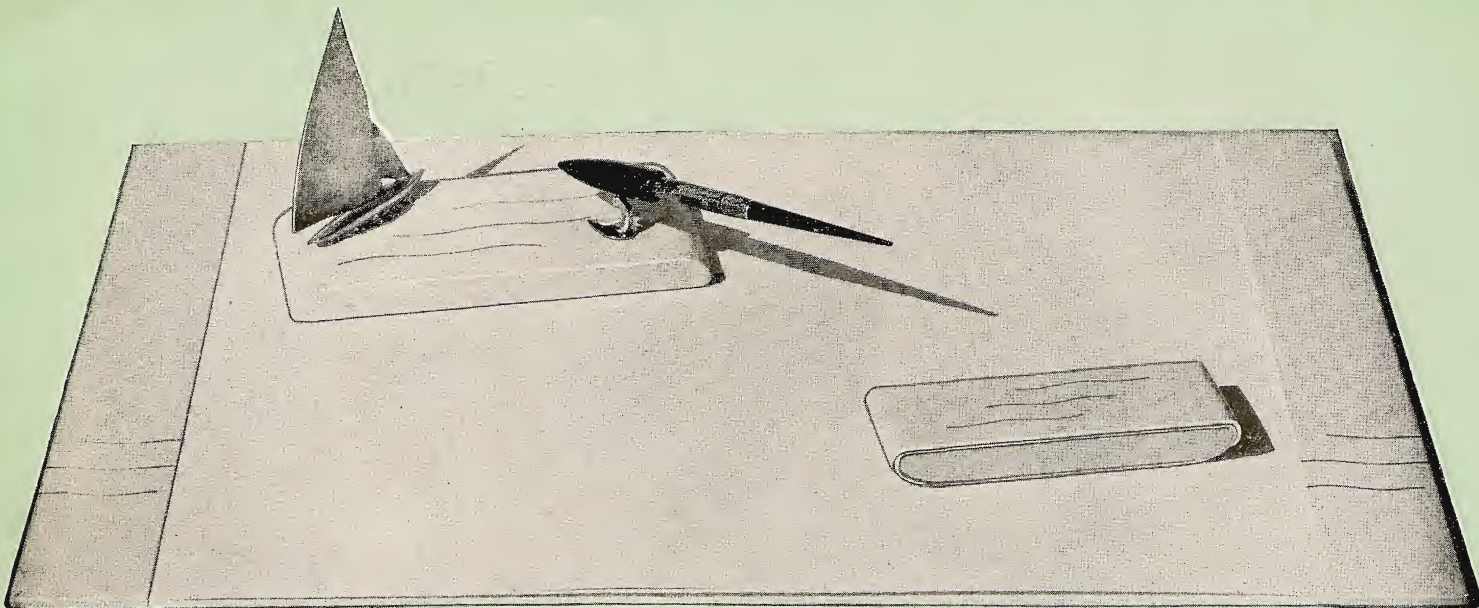

3 Automatically ejects pen unless you insert it firmly, thus warning you the "perfect seal" has not been made.

4 Automatically clasps pen in air-tight seal and holds it ready to write minutes, hours, or days later.

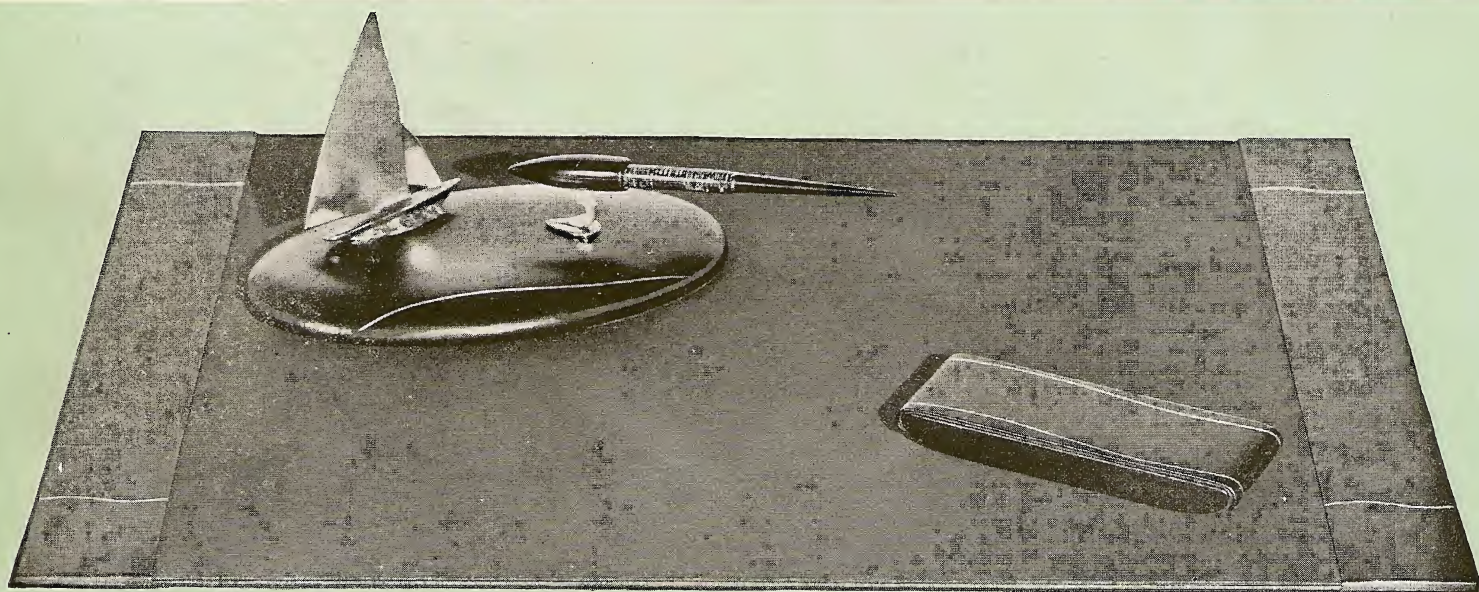

Some of the lower priced Desk Sets are fitted with Parker's exclusive desk set bowl in modern design, representing the finest development in conventional type desk pen retainer. A graceful combination of gold or chrome metal sleeve with lustrous jet bakelite.
